SUSTAINABLE DEVELOPMENT GOALS

REPH
Hack for Sustainable Future

SOUTHERN TECHNICAL UNIVERSITY

ABOUT THE HACKATHON

Southern Technical University's New Energy Hackathon is a premier platform for innovators to develop cutting-edge solutions in clean energy technologies. Held at the University's Continuing Education Center, it offers participants a chance to showcase their projects to experts and connect with industry representatives, fostering investment and support for sustainable innovations.

OUR GOAL

The Renewable Energy Hackathon inspires innovation and accelerates the adoption of clean technology by challenging participants to develop new solutions. It also fosters skill development, builds professional networks, and raises awareness about renewable energy's benefits while addressing environmental issues.
